Advanced shading and comfort

# Keep your home or business shaded every day

## Maximum Area: Width - 10ft. / Height 14ft.

### Available Options

- Remote / Manual Override
- Automation Options

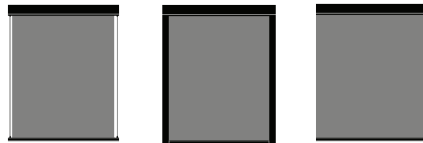

### Key Components

**Tenara.**  
SEWING THREAD

#### Tenara Thread

All our fabrics are custom sewn in-house using durable Gore Tenara thread. These threads are engineered to not deteriorate when exposed to the elements including UV light in order to not become brittle or break. Thus, you can enjoy your awning cover for a long period of time.

#### Flexible Installation Method

Vertical drop awnings excel at shading in tight spaces, and mount on nearly all surfaces. Choose from three styles: Rail System, Cable System, or Free Hanging.

#### Wide Selection of Fabric

You can choose from several hundred different fabric colors to give your awning your custom design. Rollac uses high quality and marine grade fabrics. Choose one of seven different valance styles to give your awning the final individual touch.
